

DECLARATION OF CONSENT

I, (use block capitals),
give permission to the Journal of the Norwegian Medical Association to publish photographs,
illustrations and/or videos depicting **me / my child / my relative** (circle as appropriate) and/or text
that refers to **me / my child / my relative** (circle as appropriate). I consent to processing of **my / my
child's / my relative's** (circle as appropriate) personal information for this purpose.

The material will be published without any reference to names or other obvious characteristics,
but I am aware that complete anonymity nevertheless cannot be guaranteed. It is conceivable that
someone, for example a relative or a health professional, may recognise me or the person con-
cerned in the article.

Photos, illustrations, videos and text may be published in Norwegian and English, both in the
printed issue of the Journal of the Norwegian Medical Association and its digital channels, includ-
ing its website (tidsskriftet.no) and in social media that are publicly accessible. I am aware of the
implications of this, including the possibility for third parties to copy and distribute the material.

I have seen all the photos, illustrations and/or videos concerned. I have read the text, including
any captions, of the submitted article, and I have received explanations in response to all ques-
tions I might have. I give permission to the article's authors to show it to other relevant and previ-
ous health professionals and to collect relevant supplementary information, if any, from them.

Before publication I will receive the finished article from the author and read it. I may withdraw
my consent at any time until the date of publication by contacting the responsible doctor/author
or the Journal of the Norwegian Medical Association. I am aware that the consent and the material
cannot be retracted once the article has been published, at which time the consent will be con-
verted into a non-amendable agreement on publication. To ensure the best possible anonymity
also with regard to the Journal of the Norwegian Medical Association, the consent/agreement will
be kept by the doctor to whom it is submitted. I am aware that the content of the article, including
the diagnosis and treatment, may be discussed in the Journal of the Norwegian Medical Associa-
tion or other media after publication.
