

Appendix to Anne Marit Sand, Britt Viola Danielsen, Oddvar Førland, Eirik Abildsnes, Jan Henrik Rosland. Expected deaths at home – a qualitative study of collaboration. Tidsskr Nor Legeforen 2020; 140. doi: 10.4045/tidsskr.19.0773.

This appendix is a supplement to the article and has not undergone editorial revision.

Interview guide, focus group for undertakers

1. Could you tell us about your experiences linked to deaths in the home?
2. How often do you need to transport a deceased person to the A&E clinic for completion of the death certificate?
3. Could you describe how this is handled by the A&E clinic?
4. What are your routines/procedures for allowing the family to say goodbye to the deceased person at home?
5. Do you have any suggestions for improving the current practice?
6. What would be needed to avoid transporting the deceased person to the A&E clinic for completion of the death certificate?
